

## **ThreatVision 4.0 based TVX series appliances for Advanced Log Analysis and Compliance Reporting**

The TVX series of Log and Event Correlation appliances deliver unmatched performance in a secure hardened OS with built-in database and the ThreatVision™ technology optimized for performance.

### **Centralized Log Warehouse**

Logs from event sources are collected on the VX series Collector Appliances for centralized log collection, archiving and analysis.

### **Ease of Use**

The TVX series appliance is configured and operated using a centralized web-based administration console.

### **Multi-level Access**

The access to the appliance can be configured based on the user role and affiliation. This secures the data-view based on as-needed -basis

### **Enterprise Dashboard**

The Enterprise Dashboard provides a centralized console for alerts, issue tracking, knowledgebase and escalations.

### **Deep Forensics**

The Custom Query and drill-down capability allows you to build your own query using simple web-based drop-down interface. The queries can be stored for current and future analysis.

## **ThreatVision™ TVX Series**

### **Appliances for Log Analysis and Compliance Management**

ThreatVision TVX series appliance is a purpose-built appliance for Enterprise Event Logs and Compliance management solution.

The TVX series Appliance incorporates everything an enterprise would need in order to manage the event logs from multitude of sources within the enterprise. The Universal log collection, analysis, achieving and reporting capability combined with *real-time event correlation* and alerting provides IT managers a key component of security as well as compliance management solution.

The appliance incorporates hardened OS that has been fully optimized for performance with ThreatVision technology. The appliance also incorporates secure database which stores the processed logs for historical analysis and reporting.

### **Flexible and scalable solution**

The TVX series appliances provide configuration flexibility as well as collection scalability. The Appliances can be used stand-alone or can be setup in cascading architecture to accommodate distributed enterprise architecture. The architecture scales for deployments within small to medium size businesses as well as datacenters in multi-national corporations.

The TVX series appliances can store raw and processed data internally as well as offload to an external data storage such as NAS.

### **Multi-vendor platform for Log Analysis and Event Correlation**

The core of TVX series appliances is the ThreatVision™ technology which collects, analyzes and correlates log data received from multiple vendors and in multiple formats. The data is analyzed in real-time to provide an enterprise-wide view of the compliance with security and IT controls deployed for operational and compliance reasons.

Features	TVX-500	TVX-1000	TVX-1500
			
Sustained messages/sec—up to	500	1000	1500
Maximum sources/appliance**	50	75	125
Maximum Consoles	4	6	8
Disk space	146 GB SAS	146 GB SAS	2x146 GB SAS
Memory	4 GB	4 GB	4 GB
CPU	1xDualCore	1xDual or Quad Core	1xQuadCore
OS	Hardened Linux Kernel	Hardened Linux Kernel	Hardened Linux Kernel
Database Included	Yes	Yes	Yes
Redundant Power Supply	Optional	Yes	Yes
Integrated Lights Out Support	Yes	Yes	Yes
Networking	(2) 10/100/1000 TX	(2) 10/100/1000 TX	(2) 10/100/1000 TX
Hardware Warranty Standard (Optional)	1 yr (3 yr)	1 yr (3 yr)	1 yr (3 yr)
Physical	1 RU	1 RU	1 RU

**Extensive Reporting**

The ThreatVision appliance provides extensive reporting with over 200 pre-built reports and ability to create and store reports based on custom query engine.

**Create Repeatable Compliance Audit solution**

The standardized interface, mirroring of corporate IT controls for monitoring and compliance reporting creates a solution that can be repeated on monthly, quarterly or annual audits.

**Improve IT productivity**

The automation of monitoring and reporting improves IT productivity as the administrators are not pulled away for compliance related activity such as report gathering.

\*The hardware specifications are base specifications. Additional options are available for upgrade.

\*\*The restriction is based on the license and the expected performance. The licenses can be upgraded based on the type and amount of logs being processed and their effect on performance.

**Get additional information on the appliance and how to buy**

Please visit our website, chat with our sales engineers, give us a call or send an e-mail. We will be happy to schedule a conference call or a web-based demonstration.
